Professional Summary

Aspiring Data & Business Analyst with postgraduate education in Big Data Solutions Architecture and Project Management, and a strong foundation in SQL, Power BI, Microsoft Excel, and Python. Experienced in building interactive dashboards, writing analytical SQL queries, and turning raw datasets into actionable business insights through hands-on projects. Equally comfortable supporting project coordination, reporting, and stakeholder-facing analysis, with a continuous drive to expand technical and business skills.

Education

George Brown College – Toronto, ON Ontario College Graduate Certificate, Project Management	Aug 2025
Conestoga College – Kitchener, ON Ontario College Graduate Certificate, Big Data Solutions Architecture	Aug 2024
Parul University – Vadodara, India Bachelor of Technology (B.Tech), Computer Science	Aug 2023

Technical Skills

- **Programming Languages:** SQL, Python
- **Data Visualization:** Power BI, Microsoft Excel
- **Power BI:** Power Query, DAX, Data Modeling, KPI Dashboards, Interactive Reports, Bookmarks, Slicers, Relationships, Calculated Columns, Measures
- **SQL:** SELECT, WHERE, GROUP BY, HAVING, ORDER BY, JOINS, UNION, CASE Statements, Common Table Expressions (CTEs), Subqueries, Window Functions
- **Excel:** Pivot Tables, Pivot Charts, XLOOKUP, INDEX-MATCH, IF Functions, SUMIFS, COUNTIFS, Conditional Formatting, Data Validation, Power Query, Dashboards, Charts, Slicers
- **Tools:** PostgreSQL (pgAdmin), GitHub, Jupyter Notebook, Visual Studio Code

Projects

- | | |
|---|-----------------------------------|
| Healthcare Waitlist Analysis Dashboard [GitHub] | <i>Power BI, Power Query, DAX</i> |
| <ul style="list-style-type: none">• Built a Power BI dashboard analyzing patient waitlist data (2018–2021) across inpatient and outpatient services, combining and cleaning multiple source files via Power Query's folder connector.• Built a specialty-mapping data model and DAX measures (incl. a SWITCH-based toggle) to compare current vs. prior-year performance using average and median values.• Designed dashboards with slicers, drill-through navigation, and specialty/age-group analysis, surfacing high-demand specialties and long wait periods. | |
| Adidas Sales Analysis Dashboard [GitHub] | <i>Power BI</i> |
| <ul style="list-style-type: none">• Analyzed ~9,600 rows of retailer-level sales data (2020–2021) across regions, products, and retailers to evaluate business performance.• Developed KPI cards to monitor Total Sales, Operating Profit, Units Sold, Operating Margin, and Average Selling Price.• Identified the West region and Men's Street Footwear as top revenue drivers, with sales peaking in July, August, and December. | |
| Retail Sales Analysis [GitHub] | <i>SQL (PostgreSQL)</i> |
| <ul style="list-style-type: none">• Analyzed the Kaggle Superstore dataset in PostgreSQL to evaluate sales and profit performance across regions, categories, and customer segments.• Applied CASE-based discount buckets, a subquery + join comparison against regional averages, and a RANK() window function to rank states by total sales. | |

Certifications

- **Power BI Essential Training** – LinkedIn Learning
Learned Power BI fundamentals, including data modeling, Power Query, DAX, interactive dashboard development, and business reporting.
- **SQL for Data Analysis** – LinkedIn Learning
Applied SQL techniques for data exploration, filtering, aggregation, business reporting, and analytical query development using real-world datasets.
- **SQL (Basic & Intermediate)** – HackerRank
Demonstrated proficiency in SQL fundamentals, relational database concepts, query optimization, joins, aggregate functions, subqueries, and analytical problem-solving.
- **Python Essentials 1** – Cisco Networking Academy & Python Institute
Built foundational Python skills: control structures, functions, data structures, and OOP concepts.
